Welcome to the

North Georgia

Quarter Midget Association!

A NASCAR Youth Series club serving families across Georgia and the Southeast.

Based at the Cumming Fairgrounds in Cumming, GA.

Ready to join a 30+ year tradition of excellence in youth motorsports?

At North Georgia Quarter Midget Association, we help kids ages 5-17 get started in racing in a way that is:

- Beginner-friendly
- Family-friendly
- Safe and structured
- Super fun!

No previous experience required.

Whether your child dreams of NASCAR – or is just looking for a fun and rewarding sport – we're here to help them get started.

Our esteemed alumni include:

Joey Logano — 22

Corey Heim — 11

Austin Hill — 21

Chandler Smith — 38

and more!

What is Quarter Midget Racing?

Quarter midget racing is a form of youth motorsports designed specifically for kids.

- **Cars are smaller and speeds are age-appropriate**
- **Races take place on paved and dirt oval tracks.**
- **Safety is the top priority**

But what kids really gain goes far beyond the track:

Confidence
Discipline
Focus
Teamwork
Real-world STEM experience

How to get started:

Step 1: Reach Out

Contact Josh Donahue (NGQMA President) at president@NGQMA.com and he can help you get started.

Step 2: Get a Car + Gear

Next, we'll help you find the car and safety gear you need so you can start rookie training.

Step 3: Start Rookie Training

Your child will begin learning in a safe, structured environment with our Rookie Director. Training is usually 4 sessions, once a week.

What happens after training?

Every driver follows the same path, regardless of age:

Red Rooking (Training Phase)

- **Learning the basics: safety, race procedures, how to line up**
- **Race at slower speeds**
- **Build confidence**
- **Minimum: 1 race before moving up**
- **Maximum: 10 races**

Blue Rooking (Skill Phase)

- **Same speeds as competitive class**
- **Focus on racecraft and strategy**
- **Continued coaching and confidence-building**
- **Minimum: 2 races before moving up**
- **Maximum: 10 races**

After the rookie clases, your child can move up to the competitive classes. This is when they're eligible to race for points locally, regionally, and nationally.

NOTE: The timing of when your child moves up to competitive classes is a collaborative decision between your family and the Rookie Director. Our goal is to make sure your child is set up for success considering their skills, safety, and willingness to race.

Competitve class breakdown:

Juniors:
5 yrs – 8 yrs

Seniors:
9 yrs – 100+ lbs.

Heavy:
100+ lbs. – 17 yrs

FAQs

How often can my child race?

It's flexible based on your family's schedule. At NGQMA, we typically race 1-2 times per month at our home track in Cumming. If you'd like more seat time and racing opportunities, there are nearby clubs in Huntsville, AL, Nashville, TN, and Salisbury, NC (near Charlotte). There are also regional and national series with events happening regulary. If you're willing to travel, you can race nearly every weekend!

Where does my child race?

All NGQMA races are held at our track at the Cumming Fairgrounds. Many families also choose to travel to races in nearby states. There are quarter midget clubs all across the U.S., giving you plenty of opportunities if you want to expand beyond our local club.

When and where is practice?

As a member of NGQMA, you'll have access to the track for practice whenever it's available (outside of scheduled events at the fairgrounds). Families typically practice after school or on weekends. You can practice as often — or as little — as you'd like.

Can family and friends attend races?

Yes — and we encourage it! All NGQMA races are free to attend and to the public.

How soon can my child start racing?

Children can begin:

- Practicing at 4 ½ years old
- Racing at age 5 years old

No prior experience is required.

My child is older. How quickly can they move up?

All drivers start in Red Rookie, regardless of age. To move up to the competitive classes, they need to do:

- Minimum of 1 Red Rookie race
- Minimum of 2 Blue Rookie races

From there, advancement is a collaborative decision between your family and the Rookie Director. We want to ensure each driver:

Understands race procedures
Has developed racecraft
Feels confident and safe on the track

Cars, Gear & Equipment

How and where can I get a car?

When you're ready, we'll connect you with NGQMA members who have cars and gear for sale and recommended online marketplaces with used listings. A good race-ready car will run between $3,000 – $4,500.

What kind of car should I get?

For beginners, we recommend a used quarter midget car that has been driven recently. Popular chassis brands include:

- Stanley
- Sherman
- XWing

We're happy to help you find the right fit when you're ready!

Should I buy a brand new car?

You can, but they often come with long wait times — sometimes 6 months or more before they are ready. For that reason, most families start with a quality used car so they can get on track sooner. (We can help you source your first car!)

Where do I get safety gear?

There are several companies that specialize in quarter midget racing gear. Our local option we recommend: **RaceDay Safety** in Dallas, GA. Average cost of safety gear is just over $1,000.
Note: you'll want to get a suit and safety gear specific for quarter midget racing. This is different than what you need for karting.

What tools do we need?

To get started, you'll only need:

- Basic hand tools
- Impact wrench

That covers about 90% of it. Additionally, there are a handful of specialty tools needed as you move up from Red Rookie, but none of it is necessary in the beginning.

Where do I get parts for the car?

We recommend Ultimate QM, Hanning Racing Components, and FMI Racing (local option). All of these companies have websites and will ship directly to you.

How do I customize my child's car?

You can personalize your car with custom wraps, numbers, and stickers. We can connect you with designers who specialize in quarter midget graphics.

Investment, Safety & Reassurace

What if we decide not to continue after Rookie classes?

This is a common question — and the good news is: Quarter midget equipment holds its value very well! Many families are able to resell their car, gear, and tools and recover a large portion of their investment.

Is quarter midget racing safe?

Yes! This is one of the safest youth sports in the United States. Safety is built into every part of the experience:

- Strict equipment standards
- Mandatory safety gear
- Structured training
- Vehicle inspections
- On-site EMTs

Because of this, even minor injuries in quarter midegt racing are extremly rare.

Is NGQMA on social media?

Yes! You can find us and follow on Facebook by searching NGQMA. On our page, you'll find race day announcements and other updates so you can stay in the loop!

How soon can we get started?

You can get started as soon as you have your car and safety gear! Rookie training spans 4 sessions, then if your child is ready and the Rookie Director also feels they are ready, they can join us at our next race! (We average one to two races per month.)

How do I get started?

Just reach out and we'll walk you through everything.

We'll help you:

- Find a car
- Get the right gear
- Start Rookie training

Contact Josh Donahue (NGQMA President) at president@NGQMA.com to get started.
